Yes, we will have biological staff out there pre and post-launch to monitor for effects or issues.

Subject: Fw: [EXTERNAL] Question about June 6 planned Starship launch

Good afternoon! A New York Times investigative reporter reached out and asked if we would have any personnel at or near the Boca Chica launch facility on June 6. Does ES or Refugees plan to have any staff at this event? I'm not sure we could accommodate an in-person interview (currently all SpaceX media requests are done via email/with approval from DOI) but we should at least be able to verify whether we will/will not be there.

Hello Aubry

I was wondering if you intend to have Fish and Wildlife staff at or near the launch site on Thursday.

If so, I would like to try to meet up with them after the launch

I will be in the area in an attempt to observe if the deluge system is resulting in any discharge that is reading the federal or state land

My understand from local community folks is that F&W might have personnel at the site -- after the road reopens.

Please let me know

Thank you in advance
