Hello Denise and Pat. Denise, as promised, here is a map depicting Zone 1, Zone 2 and the outlying areas of the Helena National Forest that FWP R2 and Rory with FWP R3 are looking for regarding relocation sites. Rory is busy working with the Beaverhead-Deerlodge area, so Eli and I are assisting him with sites for the R3 areas on the Helena NF. I included Wesley in on this email because I know that he is planning on reaching out to you about some sites in the Big Belts adjacent to the Beartooth WMA----so he has agreed to work with you on finding some relocation sites in the Big Belts. We will be working with you regarding the other areas on the Helena NF. We have included a spreadsheet with this map for any site the Helena National Forest determines to be appropriate. On this spreadsheet are three FWP sites on the Canyon Creek WMA that would be appropriate for late winter/early spring release sites. Again, these sites are only for non-conflict bears that have been captured in the nearby vicinity that need to be moved a short distance (for example a grizzly that is captured in a wolf trap). Later this afternoon Rory, Eli and I will provide you with some sites that we think would be appropriate----just so you can get a feeling for the types of areas we are looking for. Take care, JJJ.
