Hello Jennifer and Elizabeth. Here are two maps of our focus area. The one map depicts the Beaverhead DeerLodge lands intersecting FWP R2 territories. The second map depicts where both Beaverhead-Deerlodge NF and Helena NF lands intersect with Zone 2 (conservation strategies) and other outlying areas where grizzly activity may occur in the future. We have also attached a spreadsheet for you to add any sites that you think might be appropriate for relocations (non-conflict bears only) on Beaverhead-Deerlodge NF lands. On this spreadsheet we have added a few FWP relocation sites (work in progress.) Later today, we will send you another spreadsheet of some suggested site locations for elsewhere on the NF, just so you can get a feeling for the types of sites we are hoping for. See attached. Take care, JJJ.
