

Tribal Wildlife Grants Program

5-Year Summary

(Fiscal Year's 2021 to 2025)

Tribal Wildlife Grants Program: Federal Assistance Listing Number: 15.639

Administering Federal Agency:

Department of the Interior – U.S. Fish and Wildlife Service

Tribal Wildlife Grants Program Background: The [Tribal Wildlife Grants](#) (TWG) Program is part of a program providing wildlife conservation grants (known as the State Wildlife Grants Program) to States and to the District of Columbia, U.S. Territories, and Tribes under provisions of the Fish and Wildlife Act of 1956 and the Fish and Wildlife Coordination Act, for the development and implementation of programs for the benefit of wildlife and their habitat and species of Tribal cultural or traditional importance, including species that are not hunted or fished. TWG originates from the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 2002 (Pub. L. 107-63), when Congress first specified that the Service use a portion of the funds under the State Wildlife Grants Program to establish a competitive grant program available to federally recognized Tribes. This language allowed the Secretary of the Department of the Interior, through the Director of the U.S. Fish and Wildlife Service (Service), to establish a separate competitive Tribal grant program, known as TWG, which would not be subject to the provisions of the formula-based State Wildlife Grant Program, or other requirements of the State Wildlife Grant Program portion. The first year of TWG awards occurred in 2003, which included appropriated funds from Fiscal Year's 2002 and 2003.

Since its inception, the competitive TWG program has awarded more than \$131.1 million to federally recognized Native American Tribes throughout the United States, providing support for approximately 732 conservation projects throughout Indian Country benefitting a wide range of fish, wildlife, and habitat, including species of Native American cultural or traditional importance and species that are not hunted or fished.
