

## NJ Recognized, Qualified Indiana Bat/Northern Long-Eared Bat Surveyor List

The following list includes individuals recognized by the U.S. Fish and Wildlife Service (Service) New Jersey Field Office and the New Jersey Department of Environmental Protection (NJDEP) Endangered and Nongame Species Program as qualified to conduct surveys for Indiana bats and northern long-eared bats. This list may not include all individuals qualified to survey for these species in New Jersey. Inclusion of names on this list does not constitute endorsement by the Service, the NJDEP, or any other Federal or State agency. This list will be updated periodically.

Various techniques are used to sample and study bats in New Jersey (e.g., mist netting, acoustic detection, radio telemetry), and some surveyors on this list may not be qualified to conduct all techniques. Surveyors qualified to conduct only habitat assessments and acoustic surveys are marked with an asterisk (\*) to differentiate them from surveyors qualified to *also* conduct trapping efforts. A Scientific Collecting Permit from the NJDEP is required to capture bats in New Jersey.
