

Threat	Priority Landscapes	Priority	Reason for Prioritization	SubActivity (Conservation Action)	Barriers to implementation and/or Level of Scientific Uncertainty	Is expert elicitation needed? (Y/N)
			conserve sage-grouse and their habitat was identified as a primary threat leading to the warranted but precluded finding.	Plan County Gov't Plan Local Gov't Plan Programatic CCA Programatic CCAA WAWFWA Management Zone Regional Mitigation Strategies	political boundaries vs. biological or threat boundaries	
Grazing	Range-wide	Tier 3: Localized-substantial	Low severity, dispersed	Allotment Closure Improved Grazing Practices Road Closure		
Isolated/Small Size	States include North and South Dakota, Colorado, Utah, Oregon, Washington, California and portions of Idaho and Nevada. Sage-grouse management zones I, II, III, IV, V, VI, VII	Tier 3			<ul style="list-style-type: none"> • Insufficient connectivity • Incomplete understanding of causal factors for low populations • Uncertainty regarding value of small populations to the 3 Rs 	
Free-	States include	Tier 3	Enforcing existing	Population Control	• Maintaining horse herds at AML has	

Comment [DP4]: We may want to break this into two columns – barriers and level of uncertainty – for clarity. While we are focusing on scientific uncertainty the addition of barrier information is very useful. But I think putting both into the same column is confusing.
