Matt et al.-

This table format looks good for describing outcomes. Matt, if you're out there this week, or anyone else – do we have a copy of a table Matt started working on last week describing allocations by resource, or “inputs”? So a similar table, but for each resource we simply say if it's closed, NSO, or something else?

Thanks,

Ted

Hello Everyone,

Attached is the table/template that we crafted at the the meeting in Portland related to existing rights and future use projections for the discussion on Thursday. We structured the table to account for all of the resource allocations that address the threats in the COT report, but in some instances, the resource(s) may not be present or you may not have the information to populate some of the cells. I will not be able to attend the call, but hopefully the table is self explanatory.

Thanks and it was great seeing everyone at the meeting this week.

Matt

All,

I would like to have a call on the Existing Rights impact call next Thursday at 12:30 PM Pacific. Please let me know if this will work for you. I will send out more information and a call in number on Monday.

Joe

Joe-

I've copied here seven other key FWS folks to help us complete the effects table for resource allocations in the Great Basin. I don't think we all need to participate, but this way others have back up.

If you can propose a call for Thursday at or after 10 am, that would be great. If Frank and Matt could circulate a draft table ahead of time, that's be super.

Thanks,

Ted
