Thank you, Shelly. We are hoping an alternative was used in this watershed. We appreciate you confirming for us.

I think that this information may be incorrect. We had just approved the use of Brazos Lingnon 10 and Gina may have been misinformed. We are following up now and will provide you with the correct information ASAP.

Thanks,

Shelly

Juliette,

I was informed that Brazos Mag Chloride was the chemical used; we are diligently working on the dust suppressant products and procedures designed to be more informed on tracking and monitoring contractors when applying approved chemicals at designated locations.

Thank you.

Brandon N.

Brandon and Shelly,

Could you confirm what chemical was used on these locations?

Thank you,

Juliette Fernandez

Hi Juliette; Please learn what was used, if possible. It may have been the polymer. Thank you,
Bill

They sprayed GTR from blacktop end all the way out to the mm18 road. It appears they didn't spray "across" blackdraw... but it's all along the flood zone.

GTR. East of BD looking west at BD bridge
