Subject: San B & Glenn Ranch Well Time Series Assessment [Draft Report]
Date: Wednesday, December 16, 2020 3:44:54 PM
Attachments: (b) (5)

Please see attached the draft report for the ongoing time series assessment. Here, I looked at mean daily gallons pumped, total gallons pumped, and cumulative gallons pumped per period versus the average psi values observed at Mitigation Well, Middle Well, and Slaughter House Ranch Well. The conclusions are much of the same. A relationship exists between the observed pumping activities at Glenn Ranch Well and observed psi from the wells located near San B.
