---

Joaquin; Does this data indicate the flow meter actually started at zero, because DHS/USACE does not otherwise provide a starting number other than an August/September reading?  
Thanks for your thoughts, Bill

Can we work to model this using their numbers? I think it would be good to provide them periodic updates. Can we maybe pull together a status update bi-weekly or so? Is that doable?

Hello Juliette,

Please see attached for the Glen Ranch well meter information provided by the contractor and the USACE construction team. The Glen Ranch well is the private well leased by the contractor within proximity to the SBNWR on Tucson 3 Border Barrier project near Douglas. This is currently being reported on a monthly basis.

Please let me know if you and your team may have any updated monitoring information or new developments in the field which I may provide to the team.

Thank you for your time,

Emily

Emily,

See attached I received from the KTR on the readings they have been recording by month. If you have any questions let me know.
