Hi Matt,

Rich Baker at MN DNR forwarded your lynx sighting to me - thank you for sending your video to DNR. Can you tell me the location? A GPS point is preferred, if you have it, otherwise, a brief location description will do. I keep a database of trapping, road kill, etc. for the Fish and Wildlife Service. Thanks!

fyi - Someone from FWS Enforcement may follow up with you - but you shouldn't have anything to worry about.

Happy Holidays,
Tam

Hi Tam,

The GPS coordinates are 47° 56.890', -91° 28.119'

That's not quite exact, but it is very close (within 100 ft or so). Thanks for the follow up, glad you enjoyed the video and picture!

-Matt
