Morning Amity,

I wanted to say thanks for all the help Charlie provided on the ABB Conservation Measures document. Her experience and insight was very valuable.

We believe we have a working document that applies well to the Northern Analysis Area we share in SD and NE, and are beginning to reach out to our state partners for conciliation work (attached). If anything pops out at you as a concern, please let me know so we can address early. I'm pretty certain Charlie has already provided you much of this information, but just ensuring we are on the same page.

Mark

Subject: ABB Avoidance and Minimization

Melissa and Shaun,

Attached is our draft review of avoidance and minimization measures. We would welcome any comments/concerns you would have about content and/or conclusions.

It would be helpful to have a meeting to discuss avoidance/minimization as well as our proposed approach for assessing ABB impacts. What would be the earliest for us to meet when considering review time and availability? I will set up a Doodle poll based on your response.

Jeff
