I assume Jeff will handle Mr. Ducey's request. Kathy Konishi can provide a copy of NPPDs permit as well as the permit issued to their consultant for trapping.

Subject: [EXTERNAL] American burying beetle survey permit

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

This is a request for an ecopy of the permit which allows NPPD to entrap american burying beetles along the corridor of the proposed r-project.

I am asking for a complete copy of the permit and the period of time for which it is applicable.

Also need to know exactly how much taking, i.e., killing is allowed as associated with the trapping?

Does the FWS understand the concept of false enticement? How about destruction of public resources as nurtured on private property?
