E. IMPORT OF SPORT-HUNTED TROPHIES OF SOUTHERN AFRICAN LEOPARD AND NAMIBIAN SOUTHERN WHITE RHINOCEROS

Note 1: If you hold an import permit for trophy/trophies that you did not use, please return the unused original permit to the address on page one.

- Is raw, processed, or manufactured;
- Was legally obtained by the hunter through hunting for his or her personal use;
- Is being imported, exported, or re-exported by or on behalf of the hunter as part of the transfer from its country of origin ultimately to the hunter's country of usual residence; and

Applicant Kenton Sams
RE: Import Permit Application For a Leopard Trophy From Botswana

Fish and Wildlife Service:

Enclosed you will find an import permit application for a sport-hunted leopard trophy taken for personal use by Mr. Kenton Sams, who hunted with NKWE Safaris. Mr. Sams took his leopard on May 15th in the Ghanzi Controlled Hunting Area - CT27.

NKWE Safaris has been in operation since 2012 with history of responsible hunting practices, community investment, and anti-poaching efforts. CT27 is managed by the Masego, Molema, Mmadminare, Mapanda Community Trust and has been leased to NKWE Safaris since 2020.

Included with this application is the Botswana Department of Wildlife & National Park's Review of the Leopard Export Quota for Botswana, established per Resolution Conf. 10.14 (Rev. CoP16) and Non-detriment Determination, in Accordance with CITES Decision 18.165 as well as the CITES Document AC31 Inf. 20, Botswana's response to all issues raised during AC 31. In these documents, Botswana demonstrates that leopard populations are stable and well managed, and that the annual quota of 130 for leopard hunting is non-detrimental to the survival of the species. The accepted recommendation cited in the attached literature endorses a quota percentage for leopard varying from a maximum of 4% of the estimated population in Safari Areas to a minimum of 2% in Communal Areas. Botswana's leopard quota is well within this threshold as per the country's conservative leopard population estimate of 4,295. Moreover, as the NDF shows, the actual allocated quota is about one-third of the quota authorized by the CITES set quota, 46/130.

Please refer to the attached quota documents, the Wildlife Conservation and National Parks Act's Wildlife Hunting Quota for 2020 (carried to 2021) and the Leopard Quotas Botswana 2021 listed by CHA, which further show Botswana's internal leopard quotas to be within the recommendation's found to be non-detrimental to the species. The CITES Animals Committee has just reviewed and accepted the justification of Botswana's quota. The USFWS serves on the

Applicant:	Dean Patrick Saunders
RE:	USFWS Import Permit Application 3.200.19
Date of Take:	August 21 st , 2021
Species/Country:	Leopard/ Zambia

Good Afternoon,

Enclosed please find an application to import a sport-hunted leopard trophy for Mr. Dean Patrick Saunders. Mr. Saunders hunted with Mulobezi Hunting Safaris in the Mulobezi Hunting Block of Zambia.

No enhancement needs to be shown for leopard import permits; however, we have provided the leopard non-Detriment findings for Zambia. In those findings the quota allocations are described on page 18-19. CITES has recently reviewed and re-approved the leopard quota it has approved and continues to uphold for Zambia.

Please refer to the documents and responses included and previously submitted to the DMA by Conservation Force, Zambia's wildlife authorities, professional hunters, and Safari operators when making an enhancement decision for the permit application.

Please note that this hunting secures important leopard habitat, protects prey from poaching, and incentivizes the community to tolerate and value leopard.

If you have any questions about this import application, please do not hesitate to contact us.

Sincerely,

John Jackson
Legal Representative - Conservation Force
