Subject: [EXTERNAL] Ridgeline Expansion Project (PF22-7) agency meeting and pre-filing bi-weekly calls
Attachments: Notice of Scoping_PF22-7_7.22.22_FINAL.docx

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Hello agency representatives – I would like to introduce myself as the Environmental Project Manager at the Federal Energy Regulatory Commission (FERC) for the Ridgeline Expansion Project (Project) proposed by East Tennessee Natural Gas, LLC (East Tennessee). You are receiving this email because I would like to schedule a virtual (Microsoft Teams) interagency meeting that will cover project details, the FERC process, and any questions that you have.

You should have received a Notice of Scoping Period Requesting Comments on Environmental Issues for the Planned Ridgeline Expansion Project (NOS) on July 22, 2022 (attached). The NOS was published in the Federal Register and placed in the Commission's public record under docket number PF22-7-000. You have probably also been contacted about the project by East Tennessee or their consultants, Stantec Inc.

Here are the potential dates and times for the 1.5-hour virtual interagency meeting.

- Monday, 9/26 2:30-4 p.m. Eastern
- Tuesday, 9/27 12-4:30 p.m. Eastern
- Thursday, 9/29 3:30-5 p.m. Eastern

You will be receiving a doodle poll invitation shortly where you can indicate your availability for meeting times. **Please respond to the doodle poll by September 16, 2022** so we can finalize the meeting details.

Additionally, you will be receiving an invitation to attend a bi-weekly Microsoft Teams meeting for the Project - with East Tennessee, FERC, and the consultants for each - occurring every other Thursday at 10:00 a.m. Eastern time through the end of the FERC pre-filing period for the Project. This meeting is not mandatory but we encourage you to participate if available and interested.

If you have any questions, feel free to contact me at 202-502-8559 or nancy.fox-fernandez@ferc.gov, or Amber Plummer (Deputy Environmental Project Manager) at 202-502-8252 or amber.plummer@ferc.gov. FERC welcomes your participation in our environmental review process for this project.

Best regards,
Nancy

Nancy Fox-Fernandez (she, her, hers)
Environmental Biologist/Project Manager
Office of Energy Projects, Division of Gas Environment and Engineering (DG2E)
Federal Energy Regulatory Commission
