Nancy –

We appreciate this opportunity to request information that has not been provided to date regarding the Ridgeline Expansion project. The project proponent has been diligent in coordinating with us, and we in the Tennessee Ecological Services Field Office are not aware of any information needs beyond those that are currently being addressed.

Thank you.

Hello David – Just forwarding the email below to you given you are now a cooperator and per our conversation today in the bi-weekly call. No worries if you communicate directly with the applicant to obtain any information you need for your review, of course.

Thanks,
Nancy

Subject: Ridgeline Expansion, data request

Hello and happy new year, cooperators! East Tennessee Natural Gas, LLC (East Tennessee) filed draft resource reports (RR) 1-12 on December 9, 2022 for the Ridgeline Expansion Project (PF22-7-000). FERC staff will be issuing a data request on January 20 to obtain information we feel is required for our environmental review but was not provided. If you find that information is missing in the RRs that is required for your review of the project, and you'd like to add a question to the data request, please provide all questions to me by **January 18**.

You can find East Tennessee's draft resource reports on our elibrary at accession number 20221209-5210. Go to elibrary.ferc.gov, general search, under the pulldown that says "docket" choose "accession number," and enter the above accession number.

Have a great weekend,
Nancy
