Hello Amy, I believe Chris was just stating that holding off until the end of nesting season was a good idea. Not reading from his statement that anything changed.

Chris,

I thought the nesting season was deemed by USFWS and TPWD to end on September 1? Has something changed on that?

**Subject:** Re: [EXTERNAL] RE: Debris Retrieval - 4.20.23 Orbital Launch

Thanks Jordan!

I think the debris retrieval effort went well and looked pretty clean afterwards. As was mentioned onsite, perhaps a vehicle with a grapple hook could be useful for those larger chunks. I think the jackhammer had a bit of trouble with breaking up the larger chunks. Utilizing the eastern road and working out from there at 90 degree angles out into the tidal flats was a good idea as well as to hold off on retrieval efforts until the conclusion of the nesting season. I look forward to providing any additional input and participation on this process but I would expect that the deluge water system will protect the integrity of the launch pad.

Regards.

Reagan – That would be a good idea, as you are correct that parking at the pad is limited. Please utilize parking on the NORTH side of highway 4 near Stargate. Reminder: we will hold our kickoff discussion at 7:00am east of the pad on Highway 4.

Don't hesitate to reach out if you have additional questions or need anything tomorrow morning.

Thanks,  
Jordan

Jordan, many on the list will be driving in from different locations in multiple TPWD vehicles. Will parking be limited at the launch pad? Wondering if it would be beneficial for the TPWD folks to park near StarBase and then carpool to the launch area in two TPWD vehicles?

Thanks,  
Reagan

**Subject:** RE: Debris Retrieval - 4.20.23 Orbital Launch

Hi Matt,

TPWD/FWS met today to discuss the retrieval effort. Much appreciation was expressed for SpaceX making the decision to postpone retrieval from your own property until end of nesting season. Thank you!

The idea of a pilot retrieval effort was well received. At present count we have 5 TPWD employees, including myself, planning to attend the September 1 event. There is a lot of interest to lay eyes on the debris field and to see firsthand the retrieval process. As you might imagine, there remains concern over the use of skid steers on TPWD property. Seeing them in action on September 1 will be helpful in setting guidelines for the larger clean-up effort on TPWD property. Regarding the September 1 event, please be mindful of wet conditions should rainfall in the area continue past this week.

We are also supportive of having SEARCH conduct surveys the week of August 28<sup>th</sup> to examine the debris on TPWD property according to the Unanticipated Discoveries Plan. Biologist have informed that nesting activity wrapped up a bit early this year due to the hot and dry conditions. Additionally, this coming storm would move out remaining nesting activity, in the slim chance any remains.

Looking forward to seeing you in a few weeks!  
Reagan

Hello Matt,

Starting a clean email chain for this topic. Feel free to add folks as needed.

I have scheduled a meeting with my team on Monday afternoon to begin developing debris retrieval guidelines. It would be beneficial to hear from you prior to that meeting. Do you have availability on Friday or Monday morning for a discussion? I would like to get your input on how SpaceX envisions the upcoming retrieval effort to differ from the retrieval performed following the 02.09.2023 static fire test.

Have a wonderful day,  
Reagan
