Hi Glenn,

I tried to answer the 2 questions from John below. Let me know if you need anything else.

1. The rule being put forward is designed to mainly reduce impingement and entrainment of aquatic organisms associated with cooling water intakes. It creates standards that existing facilities must meet either through the design or through operations of their intakes.

2. We are also looking at the indirect effects of the rule which could include

I'm all ears.

Thanks

Two immediate questions from FOs. And I suspect there may be several more. If there is supplemental information that I can send to the Field, let me know.

Thanks,

Glenn

Glenn, are these intakes associated with dams, or other type of facilities?

Glenn - does the question pertain to just the operation of those intakes? the heated discharges too? Construction/maintenance of the facilities? - thanks - jw

To: "Thogerson, Collette" <collette_thogerson@fws.gov>

Hey Collette,

Could you share the attached map with the group? It may be useful for the discussion on 316b today.

Thanks!
