Attachment Withheld - b5 Deliberative Process

Hello!

Here are my starter edits on the document. I will get another time set up for us this week to talk. We need to talk a bit about acronyms a bit. I made some wording changes and then indicated places where we could use language from the NMFS BiOp. I am going to review the RPM language we have right now and send you some suggestions tomorrow.

We are working on our modified effects section, the summary table, and the revision to the EPA Table.

Drew and Patrice - Can we talk Monday about the EPA changes to the proposed action? And then we need to check-in on Wednesday again.

Thanks so much -

Cathy T.

Hi Cathy,

Attached are those sections of the BO that I've tackled thus far. I will stress that it is very rough at this point. For instance, I haven't gone back and read what I've typed so far, there may be some language consistency issues, and I've left notes for myself to come back and work on specific sections :) I started out not using track changes, but ended up switching to them later on to keep track of where I was. For ease of reviewing, you may just want to accept all changes. Patrice has not had a chance to look this over.

Sorry it's not in a more reviewer friendly shape right now!
