Because funding varied over 35 years and across multiple state and federal agencies, it is impossible to give an accurate expenditure estimate. I would make a general estimate that all agencies spent between $20 and $30 million on grizzly bear recovery in the Yellowstone Ecosystem over the past 35 years.

Can you please let me know what the total percentage of the GYE grizzly bear population is actually within the DMA? Mike just did an embargoed interview and I said I'd get back to the reporter with this info.

Happy to answer questions. Thanks!
