I go away for a couple of weeks and everything changes... gees...

Regardless, we are required to develop and post a peer review plan for all rule's per the OMB guidance. The only difference for a contracted review is it should note the role of the contractor, charge to the contractor in the scope of work, etc. My "I" drive isn't working, but we can share the Wyoming wolf version (Justin, can you try to find on the I drive).
