In case you don't have this. Location percentages were provided to Sierra Club and WY Wildlife Advocates as it is public info.

Attached hunting kills map 1959-1974 was created by IGBST and I sent a copy to Mike weeks ago. NPS and others have it.

Statistics based on 2000-2012 VHF telemetry sample of 456 individuals during all or part of 1099 bear years.

For NPS lands;

- 53.2% of our sample had no locations in NPS lands
- 46.8% of sample had >=1 location in NPS lands
- 21.6% of sample was trans NPS boundary
- 25.2% of sample was only located within NPS lands

For YNP lands;

- 61.5% of sample had no locations in YNP
- 38.5% of sample had >=1 location in YNP
- 14.6% of sample was trans YNP boundary
- 23.9% of sample was only located within YNP

For GT+JDR lands;

- 90% of sample had no locations in GT+JDR lands
- 10% of sample had >=1 location in GT+JDR lands
- 8.8% of sample was trans GT+JDR boundary
- 1.2 % of sample was only located within GT+JDR
-
