Interestingly, no one seems to understand that possible hunting framework was required by the USFWS from the states, if the proposed rule was to progress. Not initiated by the states.

Subject: Comments from IBA on PR and CS

All,

I thought it would be helpful to see the comments that were submitted by IBA. They established a review panel of respected scientists. There are several misinterpretations of our data and I would certainly argue with several of their assertions. But, by and large, I do value this as a purely scientific and independent review and it would behoove us to take note of these comments.

I would appreciate any feedback.

Frank
