In regards to the paragraph describing the objective for secure habitat within the PCA in Chapter 4, we all agreed to drop the term population from the paragraph because Chapter 4 is the chapter on habitat. Will you add the language that was dropped (i.e. the PCA being a secure area for bears where the population is managed to allow expansion beyond the PCA) to the Population Management Chapter? Or are we completely redefining the objective of the PCA? This could have ramifications for connectivity to the NCDE and our genetic goals.
