Easy enough. I will get this to you. Don't hesitate to ask for anything - we may as well get it right this time!

Don't want to put too much on you but what would this look like if you added the whitebark pine layer so that people can see that the transects are well distributed throughout available WBP?

Thanks!

Jennifer,
Not sure if this is what you're expecting - I added topography since it looked rather bleak without the green forest lands. I can make any changes you see fit. Once we have it the way you like I'll export it at a higher resolution.

Good luck in Denver - you're amazing!
