I can forward this to the Study team; are you OK with them sending comments directly to you?

Frank

The majority of the revisions are in Chapter 3, however, given our discussion on hunter numbers I did insert a brief background on it in Chapter 4. I would appreciate any edits you may suggest and if you would pass this along to the rest of the Study Team with a plan to get any additional edits back by end of the day on Thursday. Please note that I plan on revisiting the executive summary and introduction (Chapter 1) once all edits are finalized so there are currently no changes. Please let me know if you have any questions.
