Our Population Sub-Group asked for additional time to make clarifying edits to portions of Chapter 2 and Appendix C to clear up confusion based on mixed language relating to females with coy, cubs-of-the-year, and young (pages 6, 22, 33-35, 37-40, and 50). Sub-Group members Dan Thompson (Wyoming) and Jennifer Fortin-Noreus (USFWS) worked together with Frank VanManen (IGBST) to provide these attached edits that should improve consistency. The reviewers also substituted a different figure that represents “model averaged” number of females with cubs-of-the-year on pages 37-38. This is more representative of what is being stated in Recovery Criterion 1.
