This is the busiest time of year for those of us that work in conflict management. Last time we delisted we took 10 years to write a Conservation Strategy. The time frame we are being given to write a new conservation Strategy is completely unrealistic, and those giving us this artificial deadline need to be told that. How about a reality check here, lets propose discontinuing further work on this until winter when we all have more time.

<mharoldson@usgs.gov>

Hi Frank and Mark,

I'm attaching the draft Conservation Strategy with revisions I made in light of the Study Team meeting on the 12th. The majority of the revisions are in Chapter 3, however, given our discussion on hunter numbers I did insert a brief background on it in Chapter 4. I would appreciate any edits you may suggest and if you would pass this along to the rest of the Study Team with a plan to get any additional edits back by end of the day on Thursday. Please note that I plan on revisiting the executive summary and introduction (Chapter 1) once all edits are finalized so there are currently no changes. Please let me know if you have any questions.

Thank you!

Jennifer
