Can you add this one to the list of additional DPS comments you'll share later? That will be easier for me organizationally.

Thanks!

> Hi Jennifer,

It might be easier for my organizational purposes to wait until you've found them all.

Thanks!

Hi Alex,

Here is a unique DPS comment to add to your others for summary. Would you rather me email you the comments as I come across them or wait until I have found them all?

Peer review:

- The collective assemblage of species in the GYE, however, likely differs from all other parts of the species range so there is an element of unique ecological setting. The contribution of bison to the diet of grizzlies is likely unique when considered in the context of the whole diet of grizzly bears in the GYE. This aspect, however, is not addressed and the decision focuses on the above 2 components (i.e., whitebark pine and meat).

Jennifer
