Jennifer,
I think it's a good idea to include the WR Indian Reservation just to be more inclusive of the partner agencies, especially if we are monitoring wbp habitat on their land. Take a look at attached version (300 dpi).

Lisa

You're the best! I don't mind showing the Wind River Reservation but I think the label "administrative boundaries" confuses people. They don't know if its federal, state, etc. I appreciate your help figuring out those details.

Jennifer, I had included the WR reservation since one of the transects falls on their land. However it's removed on the attached map (300 dpi). I changed the label of the gray lines to Federal Administrative Boundary since it includes PS & FS. Did you want only PS lines shown? Your wish is my command.

Lisa

Lisa,
I was working on Chapter 3 revisions again and think we should remove the Wind River Indian Reservation boundary from Figure 8 (whitebark pine) and label the gray line National Park Service Boundaries or something along those lines. Let me know what you think.
Thanks!

Jennifer,
Attached is a revised transect figure at 600 dpi. I labeled the gray lines as "Administrative Boundaries" because they include the non-federal Windriver indian reservation.

These look great. I think we'll go with version 1. Can we make small change to the legend? Add the gray line titled "Federal administrative boundaries" or something along those lines?

Hope you had a great weekend!

Jennifer,

I almost forgot to send these to you. I'm sending you 3 versions - you decide which is most appropriate. Let me know which one and I'll export it to a higher resolution for publication. Also, if you want different colors, pattern fills etc - just let me know. Have a GREAT weekend - you deserve it!
