Jennifer, I pushed forward the figure you provided to the subgroup as a replacement for figure 3 in the CS (chapter 2 page 38). Dan was promoting this as an alternative. Is this something we need to go out to population sub-group for final feedback or do you have another thought?

One thing we will be able to clear up on Tuesday is the final figure that depicts the model averaged chao2 females with cubs of the year estimate (versus raw counts or annual chao2). For some reason this one kept getting lost in translation and I was able to explain what should be in the strategy etc to Jennifer. I assumed she had shared this with you Jeff. This graph demonstrates that we have been above 48 fcoy since early 2000s

Brian-here is my report to the steering committee. The population sub-group requested additional time to address themes 5-6 which were related to one another. I am resubmitting our prior report but adding new information for Themes 5-6. My report includes edits in track changes to the Conservation Chapter related to the female with cubs-of-the-year theme. Let me know if I can be of further assistance. Thanks, Jeff

Subject: Selection to population management sub-group of the CS Steering Committee

All,

You have been selected by the YES Conservation Strategy Oversight Committee to serve on the population management sub-group. Attached is a short description of your charge and the major themes identified by YES that your group will be tasked with addressing. We ask that you address this quickly as the first **deadline** for a report back to the Steering Committee is **May 25th**.

I ask that Jeff Gould take the lead in coordinating the first meeting. One key task for the first meeting will be to decide on your sub-group chair person who will take over this role for future meetings.

Please contact any of the Steering Committee members or myself if you have questions or concerns. Both Jodi Bush and Loren Grosskopf are members of your committee and the Steering Committee which should serve to help answer many of your questions.

Brian
