Jodi could you please post a map of the PCA and DMA that is sufficiently detailed for the public to discern roads, drainages etc (especially where it might impact private lands). Post on your web site with a link in the CS , fed register etc? any need to provide a more detailed map in the CS ? Loren Grosskopf, Park County Commissioner _____

Do you folks think we could do this? the issue is having either an interactive map or a static map with more topo and road features so folks could see where the boundaries of the PCA and DMA are. I bet GIS folks in RO could help. JB

Lisa Landenburger is the person that handles our maps and has all of the layers. It would be fairly easy to have static map with greater detail available on our website. It would be too detailed to print in the CS or rule given the print size. An interactive map would be much more time intensive to create. Thoughts?

I am just looping in Seth and Serena. I don't see a problem with having a clearer map. Could be helpful from a communications standpoint. If you think Lisa could create a static version that is sufficient, we can go that route. If you think an interactive version would better suit our needs, I can talk to Kate Norman (decision support branch in RO) to see if anyone on her team would have the bandwidth to assist.

Let me know what your preferences would be!

Not sure if we need help (Jennifer, thoughts?), but adding Kate to this discussion in case she has thoughts on how her division might help. Also adding Rob, our webmaster in case he has thoughts.

Hello All,

I just chatted with Seth. Would it meet the need if we requested Lisa Landenburger, USGS, create a static map that we could upload to our grizzly bear website, along with making the GIS layers available, similar to how we did for the Greater Sage-Grouse decision? Science Base hosted those for us, and perhaps USGS has these layers available online now.

Rob can create an interactive map using Google maps, not the GIS layers, if we wish, just know that is a significant time committement, which is why I am checking to see if a static map provides the information in a useful enough manner?

Please let us know. Thanks!

So I did some poking around on the IGBST website and found links to some maps and data. Would these suffice?

Somewhat interactive map: http://usgs.maps.arcgis.com/home/webmap/viewer.html?webmap=78152b8e0bde457ca95918fdd48c5352
Downloadable shape files: https://www.sciencebase.gov/catalog/item/554ceb27e4b082ec54129da3

Jodi

could you please post a map of the PCA and DMA that is sufficiently detailed for the public to discern roads, drainages etc (especially where it might impact private lands). Post on your web site with a link in the CS , fed register etc?

any need to provide a more detailed map in the CS ?

Sorry I can't make these work. I mean I don't get to a map. What we need is a map the public

sees and then can zoom in on to see roads and topo features. I dont know if these links do that. JB

I wonder why that first link isn't working for you. For me, I see a fairly detailed map with the recovery zone/PCA boundary, the DMA boundary, and the DPS boundary. You can zoom in to see very small creeks, lakes, and elevation. Maybe try clicking to it from here? https://www.usgs.gov/science/interagency-grizzly-bear-study-team?qt-science_center_objects=6#qt-science_center_objects. Select the first link, "IGBST Boundary Maps." Based on the need you are describing, I think this will suffice (but perhaps I can only access it because I am on a DOI network?). Just trying to make sure we don't duplicate effort if what we need already exists!

Science Base hosted those for

us, and perhaps USGS has these layers available online now.

Rob can create an interactive map using Google maps, not the GIS layers, if we wish, just know that is a significant time committement, which is why I am checking to see if a static map provides the information in a useful enough manner?

Please let us know. Thanks!

I think so? This is IGBST's data and map so we may want to check with them first, just as a courtesy. And we may want to test to make sure someone not on a DOI network can access it (maybe Jennifer can try opening it from home?). I don't want to link to something that is not actually publicly available.

I just chatted with Seth. Would it meet the need if we requested Lisa Landenburger, USGS, create a static map that we could upload to our grizzly bear website, along with making the GIS layers available, similar to how we did for the Greater Sage-Grouse decision? Science Base hosted those for us, and perhaps USGS has these layers available online now.

Rob can create an interactive map using Google maps, not the GIS layers, if we wish, just know that is a significant time committement, which is why I am checking to see if a static map provides the information in a useful enough manner?

Please let us know. Thanks!

Loren. Does this link to a map on the USGS site have what you were hoping to see? If it does we will try to get it put up on our site.

Go to https://www.usgs.gov/science/interagency-grizzly-bear-study-team?qt-science_center_objects=6#qt-science_center_objects. Select the first link, "IGBST Boundary Maps."

You can select the plus or negative to zoom in or out.

great. thanks Jodi! Let me know if there is anything else I can do from here.

I also sent a link to GIS layers, not sure if that one worked. Does your contact in Park County need that kind of raw data too? Would there be interest in linking to those layers, in addition to the map?

Subject: Fwd: map of PCA & DMA

Can we make sure this link gets up on grizzly page AND we add the link to an appropriate place in the conservation strategy? JB

Jodi L. Bush
Office Supervisor
Montana State Ecological Services Office
585 Shepard Way, Suite 1
Helena, MT 59601
(406) 449-5225, ext.205

So we can add the link to the CS if folks think that's what they want
but will absolutely put on an g bear web page. JB
