Sorry I can't make these work. I mean I don't get to a map. What we need is a map the public sees and then can zoom in on to see roads and topo features. I dont know if these links do that. JB

Would it meet the need if we requested Lisa Landenburger, USGS, create a static map that we could upload to our grizzly bear website, along with making the GIS layers available, similar to how we did for the Greater Sage-Grouse decision? Science Base hosted those for us, and perhaps USGS has these layers available online now.
> >

Please let us know. Thanks!

> I am just looping in Seth and Serena. I don't see a problem with having a clearer map. Could be helpful from a communications standpoint. If you think Lisa could create a static version that is sufficient, we can go that route. If you think an interactive version would better suit our needs, I can talk to Kate Norman (decision support branch in RO) to see if anyone on her team would have the bandwidth to assist.

Do you folks think we could do this? the issue is having either an interactive map or a static map with more topo and road features so folks could see where the boundaries of the PCA and DMA are. I bet GIS folks in RO could help. JB

Jodi

could you please post a map of the PCA and DMA that is sufficiently detailed for the public to discern roads, drainages etc (especially where it might impact private lands). Post on your web site with a link in the CS , fed register etc?

any need to provide a more detailed map in the CS ?

Loren Grosskopf, Park County Commissioner
