

The grizzly bear recovery zones. This proposed delisting action will only affect the Greater Yellowstone Ecosystem. All other grizzly bear populations will remain listed as threatened.

The Greater Yellowstone Ecosystem boundaries

Distribution of unduplicated females with cubs-of-the-year in the Greater Yellowstone Ecosystem

Estimated number of unique female grizzly bears with cubs-of-the-year (cubs) based on the Chao2 estimator and trend based on model-averaged Chao2 estimates, Greater Yellowstone Ecosystem, 1983-2015. Estimates since 2012 exclude observations of females with cubs outside the demographic monitoring area (DMA).
