Subject: RE: Latest comments on workshop report and your responses
Attachments: demo review process flowchart.docx

Frank and Mark,

I assume you are working on the internal review and once that is complete you can finalize this report, correct? How long will the internal review take? I am hoping it will be before the end of August . I think it best that this be an IGBST report as we have never released a FWS “report series” on anything to do with Yellowstone or grizzly bears.

Attached is the process we see to complete the amendments of the CS and the recovery plan chapter using the report as the scientific basis. We see the NOI going out in November for comment on the amendments.

Getting this out and posted on the IGBST website and sent to YES as soon as possible is important.

**Thanks,
Chris**
