Mark,

Do you have the final of this document somewhere? It is a USGS document. The date is late 2008.

Thanks,

Chris

Chris,

The only thing on this topic I can find is a proposal that was done in 2008, and then the paper we published in Ursus of results from the initial batch of samples. I have nothing regarding announcements or summarizing public comment. We will have to talk with Chuck. I will also ask Karrie West if she recalls these these items.

Mark

Mark
The study team amended the CS in 2007 or so to refine the way genetics would be monitored. The study team lead this process as the grizzly was delisted at the time. Do you have any announcement of doing this or what was sent out for ask for public comment on this? Neither I or Rebecca have these materials as they were initiated by the study team and the public comment was sent to the study team.
Thanks,
c
