Hi Lisa,

I hate to say it but I need them ASAP as I'm supposed to have all of the edits done to the Strategy today. I just got a notification that some UM emails were being blocked as spam so you probably didn't receive my previous emails.

The requests for figures 2 and 7 came from Dave Gustine. I have left him a message to clarify but I think what is probably referring to is that there is a large white area on the map where Grand Teton National Park is.

Let's look at the DMA on figure 6 and then decide if it's too messy. We received a few comments suggesting that the DMA be shown.

Please let me know if you have any questions and what the timeline is for this.

Thanks!

Jennifer

Hi Jennifer,

I'm not sure what previous email you refer to - this is the first I have heard about new figures. When do you need these by?

- > Figure 2 was not mine, but I will reconstruct something similar and add GT & JDR
- > Fig 6 - I can add DMA but it may look awfully busy with the 2014 Distribution + PCA boundaries & annotation
- > Fig 7 - I'm not sure what BMU 27 refers to. There's only 18 BMUs. I have all BAUs mapped.

Please ignore my reference to Figure 6 in my last email. We need the GTNP and JDR boundaries added to Figure 2 and the DMA boundary added to Figure 6 (all in the CS). GTNP also requests that the boundary for BMU 27 be included in Figure 7.

Thank you!
