---

I like the inclusion of the DPS boundaries. Thank you for thinking of that!

Hi Jennifer,

FYI - I have sent off a blurb on food storage order and connectivity for Dan and Scott to comment on. I integrated it into the connectivity section in Chapter 3; and I'm thinking it looks pretty good. We should have something to you soon.

Meanwhile, since I mention the DPS boundary in the body of text, I have attached another map with the DPS boundary that you may want to use. It's up to you. Also, I made a minor modification to the previous figure in case you decide to stick with the original .... It had a small error which no one else would probably notice – a tiny sliver of land that protrudes from the north portion of the Gallatin that has no food storage coverage (just inside the N border of the DMA). This sliver is actually private land. So this is corrected for in the attached figures. Thanks for taking these last minute additions.
