Do we need to have a final sub-group conference call to approve this language? At the September 8th meeting, we were instructed to have all of the proposed edits to the Strategy done by September 20th.

Subject: Re: habitat proposal

language looks good to grand teton NP as well -- exclusion of timeline sounds fine.

I vote we exclude it.

If we include the timeline I propose it is as an appendix; however, we have no issues in

either including it or not, whatever the group decides.

Probably no need to have the timeline in the Conservation Strategy, but I don't mind if its in there. The NPS will go with what ever the committee thinks on that one.

Kerry, your comments on the timeline looks good to me. I have only one last minor change/comment to the header for the Timeline (at end of the document). However, I'm not sure if it's relevant since I don't know if we plan to include the Timeline in the new language, or is this only for our own edification?

Subject: Re: habitat proposal

Habitat Sub-group:

Dan Wenk approved this concept. Attached are my minor edits to the Forest Service recent draft (in track changes).

Habitat Subcommittee,

The YES Committee was in agreement with the concept represented in the attached proposal. We have been directed to provide some final recommended language for committee consideration by Sept. 15 -

FS folks provided some edits yesterday for consideration (see attached), and at the meeting today there was an advocacy to speed up the timeline as much as possible.

So please review the attached Sept. 7 proposal - it shows proposed edits to the Sept. 2 version that was out last week. Please let me know if you have strong feelings one way or the other re: last week's 9/2 proposal vs. the edited 9/7 version. If there are significant concerns, we will convene a conf. call. If not, then please provide any additional comments/edits on the proposal, including the timeline. Sooner is better.

Lisa has been reworking the most recently circulated draft related to developed sites standards (CS Chapter 3). Although we realize that the issue of what approach to take has not been approved by YNP, we wanted you to have these insights before tomorrow's YES

virtual meeting. We know there are additional discussions to follow.

Our main concern with the standing draft was the need to use more general language for now, rather than committing to a specific mitigation approach. In addition, we wanted to make allowance for FS involvement. We can return to this editing process after tomorrow's discussion. Thanks.
