Habitat Subcommittee,

The YES Committee was in agreement with the concept represented in the attached proposal. We have been directed to provide some final recommended language for committee consideration by Sept. 15 –

FS folks provided some edits yesterday for consideration (see attached), and at the meeting today there was an advocacy to speed up the timeline as much as possible.

So please review the attached Sept. 7 proposal – it shows proposed edits to the Sept. 2 version that was out last week. Please let me know if you have strong feelings one way or the other re: last week's 9/2 proposal vs. the edited 9/7 version. If there are significant concerns, we will convene a conf. call. If not, then please provide any additional comments/edits on the proposal, including the timeline. Sooner is better.

Thank you,

Ken McDonald

Subject: FW: habitat proposal

Lisa has been reworking the most recently circulated draft related to developed sites standards (CS Chapter 3). Although we realize that the issue of what approach to take has not been approved by YNP, we wanted you to have these insights before tomorrow's YES virtual meeting. We know there are additional discussions to follow.

Our main concern with the standing draft was the need to use more general language for now, rather than committing to a specific mitigation approach. In addition, we wanted to make allowance for FS involvement. We can return to this editing process after tomorrow's discussion. Thanks.
