Lisa has been reworking the most recently circulated draft related to developed sites standards (CS Chapter 3). Although we realize that the issue of what approach to take has not been approved by YNP, we wanted you to have these insights before tomorrow's YES virtual meeting. We know there are additional discussions to follow.

Our main concern with the standing draft was the need to use more general language for now, rather than committing to a specific mitigation approach. In addition, we wanted to make allowance for FS involvement. We can return to this editing process after tomorrow's discussion. Thanks.
