Ken and others,

I have rewritten the subcommittee proposal (cleaned it up a bit) assuming that we will go ahead with the decisions discussed at our last subcommittee call. I've been asked to hold off on distributing it until we hear from Kerry regarding Wenk's reaction.

I have not been able to catch up with all the cast of FS characters to have then understand and endorse this approach. But it is safe to assume that this will work for FS. However, Lisa has a few insights on wordsmithing with the draft proposal, which we will offer today. But none of this will change the overall concept. We had been holding off waiting to see the YNP reaction first. Kerry, can represent their interests, but as of this morning, I think they were looking for a final internal blessing.

Haven't heard back from anyone since the Friday call, so assume this is OK with YNP? And will plan on presenting the attached at the YES meeting tomorrow recognizing some elements of the timeline might e adjusted but the end date stays the same?

As per the phone conversation today, we will continue to work on the “subcommittee proposal” with the hope of having a pretty clean proposal by the Sept. 8th meeting. The primary edit to the document is the addition of an approval process for what gets developed before the end of 2018. The intent of this process is that each federal land management agency must approve the final product, and the USFWS. I added some draft language to that effect at the end of the proposal, highlighted in yellow.

With that, our charge is to edit the attached proposal and timeline to make sure it meets everyone’s needs and interests. Please have any suggested edits to me ideally by Tuesday, and we can continue to tweak from there up to Thursday, Sept. 8 when the YES meets.

Thank you,

Habitat sub-group, here is the language for the Developed Site Standard that I developed which would give the NPS the flexibility it needs to address significantly increasing visitation while still protecting bear habitat.

Attached is some language regarding the 1998 baseline for developed site standards that Kerry developed. Once you are OK with the language, Kerry can send it to GRTE, USFS, and USFWS. Thanks.

PJ,

Here is a quick first stab at it. I think it would fit our needs.
