Do not allow the delisting of the grizzly of the greater Yellowstone region. Based upon the high mortality rate documented in the interagency grizzly bear study group for 2015 and to date 2016, the Grizzlies are not fully recovered and the draft proposal is based on political views. Continued loss of habitat and food resources show that the grizzly needs more time to adjust to the effects of climate change and connectivity of habitat. If we are to preserve this species, delisting is NOT the answer.
