---

Frank,  
The Service would like you to address all relevant issues brought up in the comments. Please make necessary changes to the PR and CS. We would like to minimize the additional language so please consider what needs to be added to the main text versus what we can address in the response to comments. Please let me know if you have any additional questions. Thank you so much for your assistance with this!  
Jennifer

Hi Jennifer,

Just to be clear on our task, I assume FWS wants us to address all relevant issues brought up in the comments and have those reflected in the texts of the PR and CS? To properly address these comments will require quite a bit of added language. Not a problem from our end but I know there is a balance between detail and clarity so I guess I'm just trying to gauge the level of detail that you guys are looking for.....

Frank

Hi Frank and Mark,

Thank you for discussing with me on Friday a plan of action for summarizing and responding to the issues raised during the public comment period on the proposed rule and the conservation strategy. I have attached the first issue identified along with the relevant text from the proposed rule and the conservation strategy. Feel free to separate this issue into more than one issue depending on your recommendations for summary, potential edits, and responses. Please let me know if you have any questions.

Thanks!

Jennifer
