Attachments: [Chapter3 proposed revisions + 1998 development standards LL JFN DT 10Aug2016.docx](#)

Attached includes edits to Chapter 3 that acknowledge 1) the need for changes in the way we measure and track developed sites and 2) the need to accommodate increased need for infrastructure due to increased visitation. I left this latter part somewhat general since I don't think we want to commit ourselves prematurely to specific changes that will be established during the next 5-year review process.

These edits were hammered out today by Jennifer, Dan Tyers and myself since I was out of the office for the last 4 days. I apologize for the short notice.

Habitat sub-group, here is the language for the Developed Site Standard that I developed which would give the NPS the flexibility it needs to address significantly increasing visitation while still protecting bear habitat.

Attached is some language regarding the 1998 baseline for developed site standards that Kerry developed. Once you are OK with the language, Kerry can send it to GRTE, USFS, and USFWS. Thanks.

To: P White <pj_white@nps.gov>

PJ,

Here is a quick first stab at it. I think it would fit our needs.
