Attached are edits and comments on Chapter 3. I tried to base my comments on the discussion that occurred in Bozeman regarding reduced reliance on "4 food groups" and a general discussion on body condition. It was my recollection that we would bring up the idea of continued assessment of body condition but not require it as some kind of monitoring stipulation (hence a lot of removal of additional language that you'll see in my edits). For the purposes of this I stuck with Chapter 3.

We'll probably have to touch base as a group once everyone gets comments in.

Thanks

DT
