Rod	Ridenour	Sandy	UT	84094	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Russ	Crombie	Visalia	CA	93292	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Kevin	Sulitz	Los Osos	CA	93412			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Chloe	Rice	Shoreview	MN	55126	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Nancy J	Danard	Berkeley	CA	94703	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Bridget	Fitzgerald	Englewood	CO	80112	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Janet	Flinkstrom	Ashby	MA	1431	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Robert and P	Lund	Brainerd	MN	56401	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Marianne	Flanagan	Des Plaines	IL	60018	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Dawn	Florio	North Royalton	OH	44133	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Michele	Paxson	East Meadow	NY	11554	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
M	Port	Boynton Bea	FL	33472	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Cindy	Marvin	Morristown	NJ	7960	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Veronica	Lozada	Bayside	NY	11364	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Marlene	Penry	Ocean Shores	WA	98569			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Debra	Harpole	Troy	MO	63379	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Denise	Griffin	Mobile	AL	36695	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. By removing the grizzly from the Endangered Species Act, all you will be doing is creating the problem to start again. These bears are nowhere near the number that need to be in the wild and for you to even think about removing them from the Endangered Species Act is quite honestly the WRONG THING TO DO!!!! Save our wildlife, do not it be destroyed simply because you THINK they have repopulated enough to no longer be endangered. If you think this, then you are WRONG! Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Sue	Copeland	Framingham	MA	1701	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Darren	Edwards	Woodland Hills	CA	91364	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Patrick	Beaudry	Worcester	MA	1606			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Mary	Gullett	Land i lakes	FL	34639	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Christopher	Ecker	Rockville	MD	20850	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Mary	Roehrig	Topsham	ME	4086	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Matthew	Perriam	Alexandria	VA	22314	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Helene	Myers	Boise	ID	83705	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Johanna	Wermers	Rockville	MD	20850	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Britt	Clemm	Santa Clara	CA	95051	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Theresa	Beers	Los angeles	CA	90066			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Louise	Angelis	Glenview	IL	60026	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will remain conservation-reliant as long as humans continue to live. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. They also contribute to the balance of natural ecosystems. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Liz	Murphy	Lafayette	TN	37083	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in the West—they are highly valued by photographers and wildlife viewers, and contribute significantly to the tourism economy of the region. Strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations. Sincerely,

Warwick	Neal	Maybeury	WV	24861	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Marilyn	Miller	Springfield	IL	62704	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story,but Grizzly bears are slow in producing young bears and require several more years to reestablish themselves in their natural home in Yellowstone ecosystem. I am concerned that the draft delisting rule and conservation strategy falls short of what is required to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue before there are mass bear hunts reestablished in this area. Look what has happened to the grey wolf in Northeast. Ranchers along with their official buddies are killing the grey wolf by air, poisoning the pups in their dens, and killing them every time they see one. They intend to wipe them off the earth permanently this time. Taxpayers contributed to saving them only to have them murdered by the greedy ranchers yet again. I don't want to see this happen to the Grizzly Bears in Yellowstone. Please give them a chance to live in peace. I hope on e day soon to be able to go to Yellowstone to see them from a distance of course. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Suzanne	Hausner	Ketchum	ID	83340	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Betsy	Berlin	Silver Spring	MD	20906	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Lilyana	Srnoguy	Bozeman	MT	59715	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Larry	Bader	Harshaw	WI	54529	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Linda	Petrulias	Cazadero	CA	95421	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Martha	Dingilian	Santa Barbara	CA	93035	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Pierre	Schlemel	Old Bethpage	NY	11804	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been an amazing Endangered Species Act success story, but, I am VERY concerned that the draft DELISTING rule and conservation strategy falls SHORT of what is needed to protect grizzly bears and their habitat once federal protections are REMOVED. I STRONGLY urge you to STRENGTHEN the draft to ENSURE grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too LIMITED in geographic scope—they should be STRENGTHENED and EXTENDED throughout the Greater Yellowstone Ecosystem. Also, please REQUIRE additional protections for bears and habitat in key areas that ALLOW Yellowstone bears to CONNECT to other bears. Secondly, please CREATE a delay in the onset of ANY grizzly bear hunting for SEVERAL years post-delisting to minimize mortality during the transition. Also, please PERMANENTLY PROHIBIT hunting in or near Yellowstone and Grand Teton National Parks to protect CORE habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize NONLETHAL techniques, BEFORE lethal removal is ALLOWED, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will ALWAYS be conservation-RELIANT. Please ensure ADEQUATE commitments and funding for LONG-TERM grizzly bear monitoring and conservation are in place PRIOR to delisting. Grizzly bears are an iconic animal in the West—they are HIGHLY valued by photographers AND wildlife viewers alike, and contribute SIGNIFICANTLY to the tourism ECONOMY of the region. Please STRENGTHEN the draft DELISTING plan to ENSURE that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Tania	Malven	Tucson	AZ	85719	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Sally	Vince	Chardon	OH	44024	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Patty	Kowalczyk	Peru	IL	61354	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Joe	Swierkosz	Palatine	IL	60067	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. susan	rudnicki	Manhattan B	CA	90266	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, good scientific adherence would require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, the American public is skeptical of ANY need to hunt grizzly bears. This sounds like a deal hatched to mollify livestock grazers (already receiving subsidization from the public funding of grazing permits on PUBLIC lands) and to satisfy a microscopic number of hunters. It is in the public interest to permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat. Please remember the millions who come to see the bears and the beauty of what little Nature we still have. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. You should ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. As a resident of the State of California, (the state animal being the Grizzly Bear, ironically), I need not remind you that the state where I live exterminated its bear population long ago. It is not lost on many of us citizens that the bears of Yellowstone would be gone as well if the grazing and hunting industries had the full control of the situation. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. This contribution amounts to a much larger share of the economy than grazing or hunting, as well as being a boon to more of America's citizens. Strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>
Stephen	Babb	Henderson	NV	89052			Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Brigette	Greener	San Jose	CA	95126	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Mary Jane	Toulou	Lakewood	WA	98498	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Sean	Denny	San Francisco	CA	94129	US		Strengthen Y	Dear Director Ashe, Please do all you can do for the conservation and continued listing of grizzly bears under the Endangered Species Act. Please follow the recommendations of conservation scientists trained in the conservation and ecology of bears and other predators. De-listing often leads to dwindling populations (as evidenced by wolves) and we need to keep our predators, especially in Yellowstone, as they are vital to the integrity and health of natural systems. Thus, I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. Thank you. Sincerely,

First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Michael	Olteanu	Vallejo	CA	94591	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Frank	Hartig	Durham	NC	27704	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Mary Beth	First	Chillicothe	MO	64601	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love.
