Yolanda	Ferguson	Sugar Land	TX	77479	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Kenneth	Able	McArthur	CA	96056	US		Strongly oppo	Dear Director Ashe, There is no doubt that grizzly bears have responded positively to the protections afforded them under the ESA. There is also no doubt, as nearly all independent scientists attest, that the species faces many and increasing threats. The species has a very low reproductive rate, critical food supplies are facing increasing threats due in part to climate change, mortality from various human causes remains too high and the current populations remain too small and genetically isolated. To claim that the species is recovered throughout its range, the stated goal of ESA listing, is ludicrous. Vast areas of suitable habitat remain devoid of bears. Add to this the proposal to turn management of the species over to the states surrounding GY and it becomes a virtual sentence to extinction. It is inconceivable that you could even consider such a move considering the debacle that resulted from the similar delisting of gray wolves, itself a complete abdication of responsibility by USFWS. The states of Idaho, Montana and Wyoming have demonstrated abundantly that they have no desire to manage predators responsibly. There should never be "trophy hunting" of predators and most critically species such as the grizzly bear that is long-lived with delayed maturity and a low reproductive rate. This proposal smells of political expediency and just another example of the shameful practices of this agency with regard to endangered species.

Marianna	Mejia	Soquel	CA	95073	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jolayne	Justice	Chiloquin	OR	97624	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Dianne	Sharp	Knoxville	TN	37921	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Sheila	Kelley	Pine Bush	NY	12566	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Lorraine	Wright	San Francisco	CA	94109	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
John	Weston	Kenosha	WI	53143	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Rory	Sopoci-Belkr	Santa Fe	NM	87505	United States		Strengthen Y	Dear Director Ashe, PLEASE DO THE RIGHT THING AND HELP THESE BEARS! THE ONLY REASON YOU WOULD NOT IS THAT YOU WOULD BE INFLUENCED BY SPECIAL INTEREST GROUPS THAT WOULD ESSENTIALLY BE BRIBING YOU. YOU KNOW WHAT IS RIGHT AND WHAT THESE ANIMALS DESERVE. IF YOU DON'T LISTEN TO THAT, AND IGNORE YOUR CONSCIENCE I PRAY THAT YOU PAY THE ULTIMATE PRICE FOR IT. MAY YOUR LIFE BE HEREBY CURSED, IF YOU TURN YOUR BACK ON THESE ANIMALS. DO THE RIGHT THING. YOU KNOW FULL WELL WHAT THAT IS. PERIOD. THANK YOU.

First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Vicki	Talbott	Lexington	KY	40516			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Lynda	Robinson	San Antonio	TX	78259	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Catherine	Macan	Eureka	CA	95501	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Lucille	Roussin	New York	NY	10025	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jamila	Garrecht	Petaluma	CA	94952	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Jeannette	Szabo	Hudson	MA	1749	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Deana	Hammett	Charlotte	NC	28277	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Nancy	Henning	Sedona	AZ	86351	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ryan	Davis	Burbank	CA	91502			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Sheila	Bell	Sparks	NV	89434	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Aileen	Newberry	Georgetown	KY	40324	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Sandy	Nehrling-Ada	Glen Ellyn	IL	60137	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Cassandra	Treppeda	Elmsford	NY	10523	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

andy	tomsky	san marcos	CA	92079	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Alexandra	Dane	Ipswich	MA	1938	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jacqui	Foster	Belleville	IL	62220	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>
Juliette	Guet	Encinitas	CA	92024	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Robert	Jones	Alameda	CA	94501	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Beverly	Stewart	Las Vegas	NV	89102	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Doris	Whitfield	your city	NC	27615			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jacque	Weare	Grimes	CA	95950	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Erica	Tyron	Claremont	CA	91711	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Glenn	Toy	Ford City	PA	16226	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Sandra	Zielinski	Bloomington	IL	61704	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Liane	Casten	Wilmette	IL	60091	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

cindra	broenner	Fairfield	OH	45014	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jill	Hirschi	Pocatello	ID	83202	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Louis	Spirito	your city	CA	90265			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Patsy	Shafchuk	New Port Ric	FL	34654	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Tim	Makiewicz	Dayton	OH	45414	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Denise	Hosta	Fennville	MI	49408	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Brenda	Michaels	Issaquah	WA	98027	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Please do your duty and protect these bears. They're wonderful creatures well apart from their financial contributions to the tourism industry. They're sentient creatures, much like many humans, who experience fear and pain, and deserve to live out their furry lives unmolested by humans. Certainly protect them from hunters who need to demonstrate their macho creds by slaughtering one of these animals. Let them live in peace. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Craig	Eldred	Discovery Bay	CA	94505	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Matthew	Baucco	Bloomington	IN	47403	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Gina	Mannarelli	Erie	PA	16508	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jeff	Sheets	Boulder Cree	CA	95060	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Nadya	Tichman	Your City	CA	94602			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Charles	Daugherty	Muncie	IN	47304	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Eleanor	Cohen	Oakland	CA	94602			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love.
