Nancy	Hines	Seattle	WA	98125	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Margaret	Conti	Dryden	MI	48428	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Patrice	Garcia	Phoenix	AZ	85023	Fr		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Monika	Freiling	Schlangenbad	DE	65388	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Charles	Happel	Speedway	IN	46224	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Doris	Montagna	Rye Brook	NY	10573	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Irene	Serrano-Osborn	Columbia	MO	65203	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Kelly	Carlson	Denver	CO	80228	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Barry	Rabichow	Oak Park	IL	60302	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Kathleen	Buchanan	Bryan	TX	77803	United States		Do we have t	<p>Dear Director Ashe, Why must the US Fish & Wildlife Services be so determined to destroy all wildlife in the US. Let's kill the coyotes & wolves because of rancher complaints but the ranchers NEED to take the best action before the killing. LGD Livestock Guardian Dogs. These dogs grow up and bond with the herds. They first just try to run the wolves & coyotes away but will attack if necessary. Some dogs have actually been seen to lay in wait and lay traps for the predators. Those ranchers, who have these dogs swear by them. One rancher even said he was going to buy more. They do the work for him. All ranchers should HAVE to have them before they go crying to the US Fish & Wildlife Services. After all they are using taxpayer's money for a few ranchers, compared to the millions of Americans. The Grizzly Bears are just as important as wolves and other Apex Predators. If they are "endangering" people, then warn the people, insist they know how to make their campgrounds so they don't attract wildlife or stay in their cars. My family did stay in our car years ago when we went through Yellowstone. Please ensure conservation of the grizzly bear and wolves. Watch these videos to understand how important Apex Predators are. The first one is about Yellowstone.</p> <p>https://www.youtube.com/watch?v=ysa5OBhXz-Q https://www.youtube.com/watch?v=M18HxXve3CM</p>

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Dianna	Wood	Tehachapi	CA	93561	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Shannin	Zevian	Clearwater	FL	33756			Yellowstone	Dear Director Ashe, The draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. (I'd hate to see a repeat of the mess here in Florida.) Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thanks for your time,

Marie	Damon	Tucson	AZ	85743	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>
Dede	Chejlava	Brookfield	IL	60513	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>

Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. As a resident of Florida, I am well aware of the powerful influence of the hunting industry -, which apparently would readily hunt bears into extinction given half a chance. The Florida fish and wildlife commission is already planning the second bear hunt, still without an accurate count of the existing population! The several hundred thousand dollars profit gained from last year are sufficient motivation to disregard any concerns for our recently delisted bear population. Consequently, I urge you to strengthen protections for our grizzly bears. Hunters won't be satisfied until all our predator animals are gone. Thank you. Sincerely,
Leanne	Welch	Tacoma	WA	98465	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Kathrin	Heisig	Dortmund	7	44143	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jim	Mast	Manassas	VA	20112	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Natalie	Hayes	Frederickburg	AZ	85037	Un		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Salme	Armijo	Blue Diamon	NV	89004	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ashley	Lutz	Greensburg	PA	15601	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Maryellen	Morris	Brookeville	MD	20833	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ed	Dornheim	Glenside	PA	19038	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Candace	Brad	Steamboat Springs	CO	80487			Strengthen Y	Dear Director Ashe, I am writing today to express my concern over the proposed plan to delist the Grizzly Bear from the Endangered Species Act. Many have stated on social media and in articles concerning the subject that appealing to your office and the state governments of Idaho, Montana and Wyoming is a waste of time. As far as I am concerned, you are still part of the US Government and, as such, for the people. Therefore, I am confident that you will treat the concerns of all constituents with thoughtful consideration in this and all matters related to your work. My vote would be to keep the Grizzly Bear under the protection of the Endangered Species Act. Yes, grizzly numbers in the Greater Yellowstone Ecosystem have grown from a low near 150 before listing, to over 700. Seven Hundred.....not a large number by any means. Couple that with the facts that they are very slow to reproduce, have at best a 50% chance of making it to breeding age and their primary food sources are being devastated by climate change make this rebound in numbers tenuous at best. If delisting has to happen, then I would encourage you to make the draft delisting proposal stronger to protect those bears whose territories expand outside Yellowstone and Grand Teton National Parks. I would like to see a buffer area expanded to include the entire Greater Yellowstone Ecosystem with corridors to connect this area with that of other grizzly bear habitats, increasing the genetic viability of these bears. At this time, there is no economic or safety value to delisting. "Problem" bears are still handled on a case by case basis and economically, their value as a draw to the National Parks (Yellowstone and Teton) where they reside is estimated to be greater than \$10,000,000 per year. Any income gained by delisting and issuing hunting permits would be short lived and modest to nonexistent in comparison. The argument that trophy hunting will be economically important to saving the grizzly is arcane and outdated. One should also factor in the sentiments not only of our nation, but that of people from around the globe, many whom travel to the US annually for the chance of glimpsing one of these iconic bears. How can we ask other nations to conserve and protect their wildlife when we stop protecting ours? And, yes, they are a keystone species. Their recovery, along with that of the two other major predators in Greater Yellowstone, the wolf and the mountain lion, have been shown to have improved the health of the entire ecosystem. I hope that you will consider this argument and that, in the final vote, our federal government will stand behind continuing to protect this iconic species. Sincerely, Candace Brad, DVM

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jean	Toler	Toms River	NJ	8753	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Chris	Rice	Los Angeles	CA	90049	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

donna	stoddard	marcellus	NY	13108	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Matthew	Glock	Altamont	NY	12009	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Leslie	Sharlock	Slippery Roc	PA	16057	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Laurel	Eckert	Kansas City	MO	64116	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Steve	S	Washington	DC	20560	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Georgia	Conroy	Crofton	MD	21114	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Suzan	McGlinch	Catasauqua	PA	18032	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jane	Montonen	Palm Beach	FL	33480	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

S	Oster	Cottonwood	CA	96022			Strengthen Y	<p>Earth is on the edge of a Sixth Extinction. Close to half of all living species on the Earth could disappear by the end of this century, and humans will be the cause. This is the Sixth Mass Extinction — a loss of life that could rival the die-out that caused the dinosaurs to disappear some 65 millions years ago after an asteroid hit the planet. This time though, we’re the asteroid. At least that's how Elizabeth Kolbert, the author of the book 'The Sixth Extinction,' sees it. "We are deciding," Kolbert writes, "without quite meaning to, which evolutionary pathways will remain open and which will forever be closed. No other creature has ever managed this, and it will, unfortunately, be our most enduring legacy." In 'The Sixth Extinction' Kolbert traces our understanding of extinction from the first time it was proposed as a theory in the 1740s until now, with scientists mostly agreeing that humans may be causing it. It took scientists a long time to accept the idea that entire species could disappear. http://www.msn.com/en-us/weather/topstories/earth-is-on-the-edge-of-a-sixth-extinction/ar-BBiKwqK?ocid=iehp Most or all human/wildlife conflicts can be resolved with creative and humane solutions. We are at a juncture at this point in time and we must learn from our past. A planet with no Wildlife is not a heritage that any of us should leave to the next generation. Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Ning Su	Ong	Albany	CA	94706	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
DIANE	KASTEL	WHEATON	IN	60189	United States		Strengthen Y	delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. We strongly implore you to strengthen the draft to ensure grizzly bear conservation will continue. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. The restoration of the Yellowstone grizzly bear is example of how the Endangered Species Act works to protect and recover species from the brink of extinction. Nevertheless, we at the Endangered Species Coalition want to make certain that grizzly bear conservation work continues, and that future generations have the opportunity to see a grizzly bear in the wild. Thank you. Sincerely,
Kristin	Campbell	Waconia	MN	55387	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Joann	Hunter	Vandergrift	PA	15690	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Nan	Hunter	Atlanta	GA	30306	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Janet	McLaughlin	Rancho Santa	CA	92067	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely, Miriam K.

Nancy	Chapellier	Syracuse	NY	13224	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ginger	Clayton	Costa Mesa	CA	92626	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Annette	Overstreet	Forest	VA	24551	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Lisa	Modola	Melrose	FL	32666	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been an amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, no grizzly bear hunting should be allowed. grizzly bears can not simultaneously be protected and be hunted. They are not back in areas they previously lived prior to being almost hunted to extinction. Permanently prohibit hunting of any and all wildlife in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears and all other wildlife, including wolves, that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, for removal of any so called "nuisance bears" before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by people who care about wildlife, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. If this can not be done then delisting should not be done to these great bears. These bears continue to need protections in place to maintain protections. No hunting our grizzly bears. Thank you.</p> <p>Sincerely,</p>

Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jean	Sim	Marlborough	MA	1752	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Valerie	Thomert	Saint-Angeau	ot	16230	FR		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Thomasin	Kellermann	Cumberland	RI	2864	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Nathan	Hundemann	West Dover	VT	5356	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. We're losing our animals, please keep them safe! Thank you. Sincerely,
Lauretta	Roche	Flemington	NJ	8822	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Sarah	Jones	Centreville	VA	20121	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Tara	Sanchez	Long Beach	CA	90807	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Susan F. ((S	Roberts-Ibarr	Rohnert Park	CA	94928	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Donna	Myers	Milwaukie	OR	97267	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
