John	Lundquist	Denver	CO	80020			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Maris	Bennett	Antioch	CA	94509	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Lisa	Stone	Houston	TX	77096	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Natalie	Mcmahon	Menlo Park	CA	94025	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Krissy	Poirier	Pb	AR	71603	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
K	Gregg	El Dorado	CA	95623	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

J. Barry	Gurdin	San Francisco	CA	94122	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Patricia E.	G.	Waynesboro	VA	22980	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Tammy	Fuson	Jasper	AR	72641	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Paul	Richey	Pittsburgh	PA	15217	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Tamara	Ashley	Mishawaka	IN	46546	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Martha	Gorak	Katy	TX	77450	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ellen	Osborne	Pleasant Gard	NC	27313	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. Mats	Carnmarker	Stockholm	ot	12737	Sweden		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
David	Hufft	Theodore	AL	36582	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Irene	Brinkerhoff	Gilbert	AZ	85234	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
William	Bodine	Williamstown	NJ	8094	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Robin	Nemery	Hollywood	FL	33021	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Jennifer	Andrews	Attleboro	MA	2703	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Alexandra	Cordova	Brighton	CO	80602	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Scott	Lee	Mesa	AZ	85201	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Michael	Herchenroder	Antioch	TN	37013	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Mary	Workman	Deland	FL	32720	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Michelle	Lord	Chicago	IL	60609	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Shawn	Johnson	Encinitas	CA	92024	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. But most important is that I receive upsetting internet information about the practice and policy and behavior of FISH AND WILDLIFE departments weekly from organizations of conservation all over the country and your general response to wildlife issues and keeping them safe is frankly not acceptable to the greater population of citizens and if our wild parks and public lands are and trusted to you then it would behoove you to listen to the majority of the tax payers and fullfill your job requirements which are to protect and conserve wildlife. With all the bad press our federal and state protection agencies are getting too often the public is looking for more responsible and intelligent management of our North American wild mammals,birds,reptiles and fish. Enough is enough with the killing and culling and mismanagement of my great grandchildren a future wild area and creatures! Thank you. Sincerely,

Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ann	Long	Ormond Beach	FL	32174	United States		Strengthen Y	delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. The survival of this species is very important to me. I know that there are trigger-happy, egotistical trophy hunters eager for the opportunity to kill these magnificent animals so please do not delist them. Thank you. Sincerely,

Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Barbara	Brueckner	Port Hadlock	WA	98339			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
marisa	landsberg	Manhattan B	CA	90266	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Suzanne	Row	Mequon	WI	53092	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Terri	Pattison	Rock	WV	24747	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Elizabeth	Ryan	Berkeley	CA	94710	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Roxanne	Williams	Clearwater	FL	33765			Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Mike	Hittle	Rapid City	SD	57702	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
BC	Shelby	Portland	OR	97214	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Marck	Oconnell	Port Richey	FL	34668	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Donnette	Lafleur	Sunset	LA	70584	United States		Strengthen Y	delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the Subject region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Dale	Ramsey	New York	NY	10025			Yellowstone	Dear Director Ashe, PLEASE strengthen the draft to ensure ongoing grizzly bear conservation. The draft delisting rule and conservation strategy is insufficient. Once federal protections are removed grizzly bears and their habitat must still meet certain needs. First, grizzly bear habitat protection and demographic standard should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in those areas where Yellowstone bears connect with other bears. Second, please delay any grizzly bear hunting for several years after delisting and please permanently prohibit hunting in or near Yellowstone and Grand Teton parks. Bear & human conflict resolution should emphasize nonlethal techniques, before killing is allowed, throughout the Greater Yellowstone Ecosystem. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Strengthen the draft delisting plan to ensure that these animals thrive in the American landscape as they have since prehistory. Thank you.

Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
James	McBride	Hermitage	PA	16148	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Ella	Robson	Huntley	MT	59037	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>
Deidre	Bainbridge	Jackson	WY	83001	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. I know for a fact that in regard to the McKittrick Policy and no real prosecution of self-defense cases by USFWS and the three states WY, Montana and ID that the regulations presently in place to protect the Grizzly Bear are inadequate and there is in fact no team of prosecutors or forensic investigators state or federal with training, experience and laws in place to ensure Grizzly Bear Conservation. At present a hunter has no legal deterrent to back up slowly, it is shoot first and figure out the story later. That is not conservation it is slaughter. I have read all IGBST mortality reports since 1988 have you. If so what have you learned. Incorporate that into your Plan. Thank you. Sincerely,</p>

Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Alyssa	Filipkowski	Stacy	MN	55079	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Nuria	Ferrer	Kalmar	CA	39233	Sweden		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Hollie	Hallman	Elyria	OH	44035	US		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>
Johni	Prinz	Aberdeen	WA	98520	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>

Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,

Ellen	Sanford	Anaconda	MT	59711	United States		Strengthen Y	<p>Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,</p>

Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Donald	Walden	Mahwah	NJ	7430	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
Theo	Giesy	Norfolk	VA	23508	United States		Strengthen Y	Dear Director Ashe, The restoration of the Yellowstone grizzly bear has been amazing Endangered Species Act success story, but I am concerned that the draft delisting rule and conservation strategy falls short of what is needed to protect grizzly bears and their habitat once federal protections are removed. I strongly urge you to strengthen the draft to ensure grizzly bear conservation will continue. First, Grizzly bear habitat protections and demographic standards are too limited in geographic scope—they should be strengthened and extended throughout the Greater Yellowstone Ecosystem. Also, please require additional protections for bears and habitat in key areas that allow Yellowstone bears to connect to other bears. Secondly, please create a delay in the onset of any grizzly bear hunting for several years post-delisting to minimize mortality during the transition. Also, please permanently prohibit hunting in or near Yellowstone and Grand Teton National Parks to protect core habitat, as well as the bears that people see and love. Additionally, bear-human conflict resolution should emphasize nonlethal techniques, before lethal removal is allowed, throughout the entire Greater Yellowstone Ecosystem. Grizzly bears are a sensitive species and will always be conservation-reliant. Please ensure adequate commitments and funding for long-term grizzly bear monitoring and conservation are in place prior to delisting. Grizzly bears are an iconic animal in West—they are highly valued by photographers and wildlife viewers alike, and contribute significantly to the tourism economy of the region. Please strengthen the draft delisting plan to ensure that this Endangered Species Act success story endures for future generations of Americans to enjoy. Thank you. Sincerely,
